

# SWEEPER & CLEANER RANGE

Sweeper 2 in 1 (SCC)	132
Pickup Sweeper (BRB)	134
High Pressure Cleaner (VHPC)	136

## SWEEPER 2 IN 1

- Simple and efficient solution for all light and medium duty sweeping applications.
- Ø 520mm polyethilen brush.
- 2 in 1: sweeper-collector and side-pushing sweeper.
- Full hydraulic protection; no hydraulic backline required.
- Version "HWA +" equipped with an electric spraying system (120L).
- Recommended options: continuous hydraulic flow & hand throttle (when available).
- Side brush available from spare part department only: left (ref. 52000520) or right (ref. 52000597).

Paralelogram mounted- perfect adaptation to road profile

Optional side brush Ø 320mm

Version "+": reinforced wheels Ø 320mm

\* No compatibility with MT-X version

**MANDATORY MACHINE EQUIPMENT:**

## PICKUP SWEEPER

- Perfect sweeper for intensive/ demanding applications
- Sweep and pick-up in one operation.
- Up to 2500m<sup>2</sup> cleaned in 10 minutes.
- High quality sweeping.
- Recommended hand throttle & continuous hydraulic flow options.

**Polyester & steel brush for perfect sweeping along walls or side walks**

**Interchangeable side brush (left or right)**

**Swivel wheels for an easy driving process**

## HIGH PRESSURE CLEANER

- High pressure cleaning in total autonomy- no need for electricity or water supply.
- 45 minutes of autonomy at 200 bar.
- Pressure regulation system (10 to 200 bar).
- Manometer as standard.
- Recommended options: continuous hydraulic flow & hand throttle (when available).

Easy to hitch on  
standard forks

Nozzle spray for  
powerful and  
accurate cleaning

40 meter hose reel

## **E-Reco, an attachment recognition system for greater simplicity**

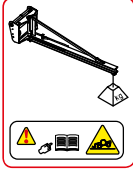

Manitou is offering, as standard, the attachment-recognition system on its new-generation of rotary telescopic trucks MRT EASY and MRT PRIVILEGE +.

The system uses RFID radio-identification technology, very widely used in industry and retail.

This autonomous technique can remotely recover and record data. The machine detects the attachment at the head of the boom, analyses its data and directly proposes the corresponding working configuration (working envelope + movement speed + safety).

This technology provides the load chart in real time, taking into account the rotation angle of the turret and the position of the machine's stabilisers and in accordance with the mobile crane standard.

## TABLE SYMBOL

	No predisposition required
	Hydraulic line
	Return piping to hydraulic oil tank
	Electric predisposition
	Platform predisposition
	Tyre handler, cylinder handler predisposition
