

Reduce your total cost of ownership (TCO)

Lowering TCO is critical to your business's profitability, which is why Manitou has made it a top priority on our medium frame CTLs.

- **Accessibility**
Cab and floor flip up 62 degrees for access to components underneath and can be lifted up or down, by a single person. Side-by-side engine/hydraulics cooler flips up 28 degrees, providing tool-free access to the top of the engine.
- **Reduced oil requirement**
A more efficient cooling system reduces the hydraulic oil requirement, so every oil change costs less.
- **Removable floor mat with drain**
To clean out the foot area, simply remove a plug and steel cover and wash everything down the drain.
- **Greasable pins**
Easily reached when standing next to the lift arms, simply grease each articulation point as part of your daily maintenance.
- **LED lights** (optional)
With LED work and road lights, you may never need to change a bulb.

“
«As a professional landscaper I use a wide variety of attachments in a lot of different environments. The equipment we use must support those attachments and have the hydraulic power to operate them effectively.»

Robust Performance

At Manitou we take pride in testing our machines to their limits because we know that's what our customers expect.

- **Vertical arms**
Vertical lift arms allow you to dump material further into large trucks to improve productivity. Provide a more stable and consistent lift path. The arms also increase also the visibility without the rear towers.
- **Tried and tested**
During development, machines are pushed to the limits for thousands of hours to ensure maximum reliability for our customers.
- **Yanmar engines**
One of the quietest, most reliable engines on the market, we've used the same Yanmar engines as on previous products, simply moving the DPF canister above the flywheel rather than above the engine.
- **Profiled lift arms**
Our patent-pending lift arm profiles provide better visibility both above and below the lift arms and reduce the chance of material build-up.

Lifetime value

Connected solution.

- **Increase productivity**
Stay connected to your machine for real time information. Ease your day-to-day workload by tracking and tracing your machine on your PC, tablet or smartphone.
- **Anticipate maintenance**
Share technical alerts directly with your technician to ensure parts availability and enable earlier, faster interventions.
- **Maintenance contract**
Enjoy stress-free ownership with our maintenance and repair options. Ensure more predictable budgeting, and benefit from the highest possible resale value.
- **Extended coverage**
Secure your business for the long run with coverage extended up to 6 years/6,000 hours.
- **Flexible financing**
Hesitating? Talk to your dealer about our customer-centric financing solutions and let's make your project a reality.

Performance and versatility to meet all your needs

Manitou machines are excellent tool platforms, enabling easy deployment of the right Manitou-approved attachment for the task.

Construction Bucket	Pallet forks carriage	Brush root grapple
Take care of dirt, debris, and fill, with our tough, high capacity buckets.	Available in a full brickguard, rotating, sliding or walk-through carriage design with a full range of fork options.	Handle awkward materials such as logs, tree stumps, brush, loose hay, or straw.
		
Hopper Broom	Blades	Auger
Sweep in forward and reverse for highly efficient material pickup, road maintenance and worksite cleanup.	From dirt to snow we offer a range of blade options to help you efficiently move material.	Fast, effective hole-digging for fencing or construction. Available with planetary gear or chain drive with a full range of bits and accessories.
		

Smooth operation
Comfort Ride Control (CRC) now standard, the lift arm's movements are cushioned and dampened for better stability, reduced load spillage, and enhanced comfort and safety.

Universal Attachment Plate
Easily connect your existing attachments (for added speed, consider adding the Power-A-Tach™ mounting system.)

3 models

Operating capacity up to **2,750 lbs**

Engine power **69 or 72 HP**

Lifting height **129.5 in**

Hydraulic flow up to **33.3 gpm**

IdealTrax™
Patented track tensioning system tensions the track to the proper tension when the machine is started & relieves tension when the machine is turned off which prolongs the track's life.

Robust design
Hydraulic lines are routed in or under the arms, protecting them at all times.

New, smaller underside access panels
The steel plates under the machine can be removed and reinstalled easily by one person should you need to access the underside of the powertrain.

High auxiliary power
Meet all attachment performance requirements with some of the highest auxiliary power specifications in the industry.

Comfort
Better visibility

Joystick
Ergonomics and precision for easy handling

New display
Intuitive use

Ease of use
Keyless start, smart throttle and intuitive lighting help inexperienced operators become productive faster.

Better visibility
Larger side and rear windows provide wider views of the worksite, while our patented sloped roof and larger front door improve visibility of the attachment and load.

Strong cast steel links
Our patent-pending vertical lift arm/boom profiles, with strong cast steel timing links, provide more reach for dumping into trucks and mixers.

High breakout forces
Some of the highest breakout forces in their class let you lift more in each work cycle.

Your expectations Our Solutions
Your application is unique. However, our skid loaders are designed to meet your requirements by offering you exactly what you expect from your machine. Ease of use, maintenance, reliability, durability and safety.
Our Manitou network will work with you to identify your operational constraints and configure the ideal machine for your application.

Choose your ride

Bucket self-leveling
Automatically maintain the bucket position when raising the lift arms.

Counterweight
A rear bumper counterweight improves productivity and protects the rear of the machine from accidental damage. Optional side counterweights can further increase operational capacity.

Pre-cleaner
Reduce engine wear and TCO in dusty environments by adding an engine pre-cleaner.

FOPSWW Level 2
For the users that need level 2 FOPS an optional level 2 heavy duty bracket delivers the protection they need. Bracket also protect the front LED work lights.

Tailor your solution to your needs

Discover a wide range of options – to learn more, talk to your Manitou dealer.

LED side lights
Mounted below the lift arm, the lights move with the load, allowing you to see where you are working.

Rear view camera
Improve worksite safety and operational efficiency by adding a rear view camera.

High-flow auxiliary
Boost hydraulic flow for high performance attachments like mulchers and concrete planers.
