

WHEELED EXCAVATOR

HW170A CR

Operating weight: 18820 kg
Engine power: 129 kW (173 HP) / 2200 rpm
Bucket capacity: 0.70 m³ - 1.05 m³

A IM HIGH

Take your performance to the next level!

Hyundai Construction Equipment has raised the benchmark again with a new series of wheeled excavators that give you the edge in numerous on-road and off-road applications. Our A-Series machines comply with EU Stage V emissions regulations while delivering higher performance, better fuel efficiency, superior travel speed on the road, an improved cabin and added safety features.

Featuring a new, compact rear design and enhanced controllability, the versatile HW170A CR is your best partner for inner city building sites and roadway construction in narrow and confined spaces, combining productivity and versatility with safety. Built for trenching, digging, dozing, drilling, cutting, lifting or site preparation, set your sights on higher efficiency and outstanding results.

Together we can move mountains!

Productivity & Efficiency

AIM FOR SUPERIOR PERFORMANCE

... with effortless power.

From its upgraded, eco-friendly engine to its carefully chosen control technologies, the HW170A CR wheeled excavator helps operators to achieve new heights of productivity. The load sensing hydraulics and Variable Power Control systems tailor the machine's performance for widely varying needs and working conditions. The compact rear design increases versatility and gives peace of mind to operators.

NEW

High-performance Stage V engine

The new Cummins B4.5 engine delivers more power and performance with 780 Nm of peak torque setting a new industry benchmark. Like all A-Series machines, the HW170A CR features our all-in-one exhaust aftertreatment system which cuts emissions and helps to ensure compliance with European Stage V requirements, the world's strictest emission regulation.

7-11% FUEL SAVINGS
depending on working operation

Engine auto-idle

The auto-idle feature saves fuel, reduces noise and cuts exhaust emissions by automatically switching the engine to idle setting when the excavator is inactive. This reduces fuel consumption without affecting productivity.

NEW

Advanced exhaust aftertreatment

Our all-in-one exhaust aftertreatment module combines a DOC, SCR and DPf in one unit. EGR-free and featuring DPf auto-regeneration, this simplified system is more robust and requires less maintenance. Removing the need for EGR has also enabled us to improve productivity through better fuel economy and longer service intervals.

NEW

Load sensing hydraulic system

Load sensing hydraulics allow for multi-functional operation and precise machine movements. Control is smooth and predictable, even with a demanding workload. By delivering power exactly when needed, the system also contributes to fuel savings.

Hydrostatic 4-wheel drive

The 4-wheel hydrostatic drive system ensures a smooth driving experience, even in rough conditions.

Tail radius
1830 mm

The rear compact radius makes the HW170A CR the ideal machine for confined work environments.

NEW

A true compact radius for enhanced manoeuvrability

The ultra-short rear swing radius allows the HW170A CR to work on narrow construction sites with people or vehicles still able to pass by. The operator can swing the turret with confidence knowing he won't hit any obstacle.

Proportional auxiliary hydraulics

Productivity is further enhanced by a proportional auxiliary hydraulics system. A proportional single or double-acting circuit is installed as standard, enabling smooth, precise control of attachments.

Eco gauge

This feature helps operators to reduce emissions and running costs by constantly monitoring efficiency. It displays engine workload and fuel-saving status while the machine is working.

Productivity & Efficiency

AIM FOR MAXIMUM RETURN ON INVESTMENT

...with the flexibility to tackle any job.

NEW

OPTION

- ◀ **Changeable blade & stabilisers**
'Plug and play' front and rear stabilisers allow for independent and tailored support according to the work environment. The blade is also fully changeable for increased versatility.

NEW

OPTION

- ◀ **Trailer hitch preparation**
The HW170A CR can easily be equipped for the addition of a trailer hitch, giving you the option to transport all necessary tools and machinery to the worksite in one trip. The preparation kit includes electric and hydraulic connectors for rear lights and braking systems.

NEW

- ◀ **Electronically controlled reversible fan**
The reversible fan is electronically controlled to provide automatic engine cooling. An improved self-cleaning fan mode efficiently eliminates dust and debris, protecting performance and productivity.

OPTION

- ◀ **Tiltrotator**
A factory-mounted Engcon tiltrotator is available as an option, boosting efficiency and profitability through enhanced control with lower fuel consumption.

2D grading

3D grading

NEW

OPTION

- ◀ **2D and 3D grading**
Your HW170A CR wheeled excavator can be supplied with factory-prepared 2D or 3D-ready Machine Control or Machine Grading systems. This gives you the flexibility to work on a wider range of job sites and applications.

Durability

AIM FOR MORE UPTIME AND DRIVING PLEASURE

... with robust construction and reliable components.

Hyundai has always been driven by the goal of providing durable machines that will create the ultimate long-term ownership experience for our customers. As well as improving engine reliability and simplifying the exhaust aftertreatment system, we have reinforced and optimised numerous other components to extend the lifetime of our A-Series wheeled excavators. Our ultimate aim is to minimise downtime and repairs so that you can stay on schedule, avoid unexpected costs and protect your profits.

Hi-grade (high-pressure) hoses

High-grade hoses with outstanding resistance to heat and pressure provide maximum durability with low maintenance, even in demanding conditions.

Durable cooling module

The HW170A CR is equipped with a new, stacked-type, easy-clean cooling module with a hydraulically driven reversible fan. As well as improving durability, it optimises fuel economy and noise reduction.

Centralised greasing system

A centralised automatic greasing system can be installed as an option. This optimises daily maintenance to prolong the life of all machine joints.

OPTION

Reinforced pins, bushings and polymer shims

The reinforced pins, bushings and polymer shims are designed for an extended lifetime with less maintenance, reducing overall ownership costs.

Reinforced upper and lower frame structure

Built for unbeatable strength and sturdiness, the HW170A CR offers solid performance over a long lifetime. The upper and lower frame structures are reinforced for high workload, while the attachments have been rigorously tested for the roughest conditions.

Operator comfort

AIM FOR MORE COMFORT AND CONVENIENCE

...with a spacious cabin and improved ergonomics.

It's easier to be productive when your workplace is comfortable and well designed. That's why we placed operators right at the centre of the HW170A CR cabin design. Light and spacious, it features a high-quality, adjustable seat and an ergonomic layout that places controls within easy, comfortable reach. Numerous features have been added to enhance convenience, reduce fatigue and promote efficiency.

3-way adjustable steering column

The steering column is ergonomically positioned and adjustable so that every operator can work more comfortably and productively.

Deluxe seat

The air suspension seat is ergonomically designed and heated, helping operators to work longer without fatigue in all weathers and seasons.

Work modes

The operator can select from three different work modes – Park, Work and Travel – for convenient automatic control of a range of functions.

Wide touchscreen monitor

The 8-inch touchscreen is one of the largest on the market and features WiFi connectivity, allowing operators to take advantage of smart technologies as they work.

Joystick steering

The HW170A CR features right-hand joystick steering for quick, easy manoeuvring and enhanced productivity.

FNR and Ram Lock Switch on joystick

The Forward/Reverse switch is positioned right at the operator's fingertip. The front axle oscillation lock can also be activated from the joystick, improving convenience and productivity on demanding jobs.

Auxiliary joystick and pedal control
A 2-way proportional auxiliary joystick and pedal control enable effortless operation to minimise operator fatigue.

Full climate control

The efficient air conditioning is enhanced with full climate control for fast heating, cooling and defrosting.

Jog dial module

For added convenience, an integrated jog dial module allows easy control of the air conditioning and instrument cluster navigation.

Operator comfort

AIM FOR EASY, EFFICIENT CONTROL

.... with the right technologies to assist you.

Attachment flow control

The load sensing hydraulic system allows for superior flow sharing performance, resulting in optimal multi-functional operation with excellent controllability. The machine memory accommodates 20 attachments (10 breaker types and 10 crusher types) to suit a wide range of applications and environments.

Power boost function

The power boost function automatically increases relief pressure for that extra push when you need it.

Cruise control & speed limiter, creep speed drive

The HW170A CR is equipped with cruise control and speed limiter systems, allowing operators to relax while maintaining a steady speed over longer distances. When creep speed is activated, the excavator will drive at a maximum speed of 3.5 km/hr. This gives the operator better control and higher torque with minimal effort.

Floating boom function

The floating boom setting allows the boom to move up and down freely under its own weight. This enables effortless levelling of surfaces.

Fine swing control

Fine swing control enables smooth movement at the beginning and end of swing operations. This improves precision in a wide range of applications and reduces spillage from the bucket.

Swing lock system

Swing lock disables the turret swing to increase safety when needed. This is particularly useful during road travel, when working next to roads and railways, or near buildings and other obstacles.

Ride control

A ride control system is available as an option. This reduces rocking of the excavator body, ensuring a smooth ride on all kinds of terrain, and reducing spillage from the bucket.

Advanced audio system

The audio system includes a radio player, USB-based MP3 player and Bluetooth for hands-free calling. The smart display of the cabin monitor mirrors mobile phone functions, keeping operators entertained and connected all day long.

Safety

AIM FOR THE HIGHEST PROTECTION FOR WORKERS

... with zero compromise on efficiency.

The Hyundai approach to safety goes far beyond just meeting regulatory standards. We prioritise safety in every aspect of our machines and work with our customers to keep improving protection for operators, co-workers, passers-by, surrounding buildings and of course the machines themselves. This includes robust, protective machine structures, a cabin design that offers a clear all-round view of machine surroundings and a series of additional features and technologies that increase peace of mind on and off the work site.

◀ **Safety valves on all cylinders**
As a standard feature, safety valves are integrated on the boom, arm, blade and ram lock hydraulic cylinders.

◀ **LED lights**
All the working lights are LED-type for greater visibility during work and travel.

◀ **Safety glass**
Safety glass has been used for all windows, including a laminated glass front window for added protection.

◀ **Cabin suspension mount**
Integrated silencer blocks minimise noise and vibration inside the cabin, reducing fatigue and allowing safer, more enjoyable operation.

◀ **Improved cabin access**
The cabin access steps have been redesigned for safe, convenient entry.

NEW

NEW

Safety

Short swing radius

The short swing radius gives operators extra peace of mind and improves safety for colleagues and passers-by: while working on one lane of a road, the machine can swing without disturbing traffic on the second lane.

Auto safety lock

The auto safety lock feature prevents unintentional ignition and random machine movement. When the safety lever is unlocked, the engine cannot be started and the system will not engage, even if the joystick is pressed accidentally.

Emergency steering

If the hydraulic supply should fail, manual steering is automatically enabled.

ROPS / FOPS certified cabin

To protect workers, the cabin structure is reinforced with integrally welded, low-stress, high-strength steel. It is certified to ISO 12117-2 (ROPS - Roll-over Protective Structures) and ISO 10262 Level 2 (FOPS - Falling Object Protective Structures) safety standards.

Advanced Around View Monitoring (AAVM)

Hyundai's AAVM camera system can be installed as an option, giving operators a 360° overview of their immediate working environment, including rear, side mirror and birds-eye views. It also integrates Intelligent Moving Object Detection (IMOD) technology that senses and warns the driver when people or objects come within five metres of the machine.

OPTION

Axles and fenders

The HW170A CR has been equipped with a heavy duty axle for higher durability and to enhance stability in different conditions and material handling applications. Sturdy fenders, covering the wheel even when steering, have been added to protect the tyres from flying debris while driving.

OPTION

New upper structure design

The upper structure has been redesigned to improve access for maintenance.

NEW

Serviceability & Connectivity

AIM FOR MAXIMUM UPTIME AND EFFICIENT SERVICING

... with intelligent machine management and easy access.

Our A-Series wheeled excavators are designed with quick, low-effort servicing in mind. Every component and material has been optimised to ensure a long, trouble-free life. Hyundai's innovative Hi MATE telematics system enables full monitoring of machine activity and performance. Maximum connectivity is integrated to help owners create a smart construction site and protect profitability as their business grows.

Mobile Fleet app

Hyundai's new Mobile Fleet app provides all the information you need to run your fleet efficiently and economically. Based on telematics, this advanced solution uses simple graphics and key performance data for smart fleet management.

Fuel filler pump
An integrated fuel filler pump with auto stop makes refuelling quick and easy.

DEF/AdBlue filler access
Access to the DEF/AdBlue tank filling point has been made easier with redesigned steps.

Hi MATE

Boost efficiency and performance

For maximum convenience and security, the HW170A CR features Hyundai's exclusive Hi MATE remote fleet management system, which uses mobile data technology to provide the highest level of service and support. You can monitor your equipment wherever you are via a dedicated website or mobile app, with access to working parameters like total engine hours, machine utilisation, actual performed working hours, fuel consumption and machine location.

ECD (Engine Connected Diagnostics)

ECD provides troubleshooting advice as well as tailored servicing and parts support from Cummins Quick Serve. Service technicians are supported with remote diagnostics reports allowing them to prepare for initial site visits, bring the right tools and achieve a higher problem resolution rate.

We're all connected!

Just 5 minutes

One-stop solution

Increase productivity

By providing information such as service hours, idle time and fuel consumption, Hi MATE saves you money and improves productivity. Service alerts enable better maintenance planning.

Monitor your machines

Hi MATE's real-time location information allows better, more convenient monitoring of your equipment. Just log onto the Hi MATE website or mobile app to see your machines at any time, from any location. Receive data online, by e-mail or directly on your mobile device.

Improve security

Protect your equipment from theft or unauthorised usage. Hi MATE's geofencing alerts notify you automatically when a machine leaves a predetermined zone.

Take the tour!

Genuine parts and warranties

THE BEST WAY TO PROTECT YOUR INVESTMENT

Hyundai Genuine Parts, accessories and warranty programmes are specially designed to keep your machine covered. They increase uptime and maintain the performance, comfort, and convenience that are built into your equipment.

Fuel filters

Hyundai fuel filters provide the right degree of filtration to keep your engine clean. They are designed to meet and exceed the engine manufacturer's prerequisites for water separation and dirt filtration, prolonging the life of your engine.

Aftermarket kits

You can order Hyundai aftermarket kits via your dealer. This AAVM system for example, improves safety in and around your work environment at all times.

Hyundai Genuine Parts

Hyundai Genuine Parts have the same design as those installed when your machine left the factory. They are subjected to rigorous quality inspections and tests to make sure they meet Hyundai's strict requirements for quality and durability. As well as minimising downtime, this helps to ensure peak performance on every task.

Hyundai warranties

Our warranties are designed to give you the cover you need to build your business with confidence and peace of mind.

Standard warranties

We offer standard warranty coverage for all wheeled excavators. In addition, optional and extended warranty periods are available, so you can benefit from full warranty coverage for longer, and even over the full lifetime of the machine. Please discuss the optimal solution for your needs with your local Hyundai dealer.

Extended warranties

Our extended warranties help you maintain full control over your operating costs. If you combine an extended warranty programme with a tailored maintenance contract, you can completely avoid unexpected costs.

A network you can rely on

Hyundai Construction Equipment Europe prioritises quick, reliable intervention to keep your equipment running reliably. In its 13000 m² warehouse, Hyundai covers over 96% of all Genuine Parts. With one of Europe's most advanced automated warehousing systems, we are able to maintain availability and efficient delivery of all our Genuine Parts. Moreover, we guarantee a 24-hour delivery service across our European dealer network.

SPECIFICATIONS

SPECIFICATIONS		HW170A CR
ENGINE		
Maker / Model	CUMMINS / B4.5	
Type	4 cylinder, water cooled, 4-cycle, turbocharged charge air cooled, direct injection, electronic controlled diesel engine.	
Gross Power	129 kW (173 hp) at 2200 rpm	
Net Power	127 kW (170 hp) at 2200 rpm	
Max. Power	129 kW (173 hp) at 2200 rpm	
Peak Torque	780 N.m at 1500 rpm	
Displacement	4.5 l	
HYDRAULIC SYSTEM		
Advanced Load Sensing System (LUDV)		
Load independent flow sharing		
MAIN PUMP		
Type	Variable displacement pump	
Max. flow	261 lpm @ 1800 rpm	
AUX PUMP		
Type	Piston pump	
Max. flow	60 lpm	
* Load Sensing - Variable displacement pump : LUDV (load independent flow sharing)		
HYDRAULIC MOTORS		
Travel	Bent - axis piston motor with brake valve and parking brake	
Swing	Radial Piston Motor	
RELIEF VALVE SETTING		
Implement circuits	350 kgf/cm2 (4970 psi)	
Travel	380 kgf/cm2 (5400 psi)	
Power boost (boom, arm, bucket)	380 kgf/cm2 (5400 psi)	
Swing circuit	285 kgf/cm² (4050 psi)	
Pilot circuit	35 kgf/cm2 (500 psi)	
Service valve	Installed	
HYDRAULIC CYLINDERS		
No. of cylinder bore X stroke	Arm: 1-120 x 1235 mm	
	Bucket: 1-105 x 995 mm	
	Blade: 2-110 x 235 mm	
	Outrigger: 2-125 x 463 mm	
	2-PCS boom: 2-110 x 992mm	
	Adjust(boom): 1-160 x 624mm	
* Hyundai Bio Hydraulic Oil (HBHO) available		
DRIVES & BRAKES		
4-wheel hydrostatic drive. Constant mesh, helical gear transmission provides 2 forward and reverse travel speeds.		
Max. drawbar pull	10720 kgf	
Travel speed	1st	1st: 9.5 km/h
	2nd	2nd: 35 km/h or 20 km/h (Option)
Gradeability	35°(70 %)	
Service Brake:		
* Independent dual brake, front and rear axle full hydraulic power brake.		
* Spring released and hydraulic applied wet type multiple disc brake.		
Parking Brake:		
* Spring applied and hydraulic released wet disc brake type in transmission.		
CONTROLS		
Pilot control	Two joysticks with one safety lever (LH): Swing and arm, (RH): Boom and bucket (ISO)	
	FNR switch on RH joystick / Ram lock switch on LH joystick	
Attachment Control	3 modes available: Push / Proportional / Permanent	
Engine throttle	Electric, Dial type	
Operation Mode	3 modes available: P-Parking W-Working T-Travel	

SPECIFICATIONS		HW170A CR
CONTROLS		
Full floating front axle is supported by center pin for oscillation. Oscillation lock (ram lock) function for safe operation. Rear axle is fixed on the lower chassis.		
Tyres	10.00-20-14PR, Dual (tube type)	
(Optional)	10.00-20, Dual (solid type)	
	10.00-20-16PR, Dual (tube type)	
STEERING SYSTEM		
Hydraulically actuated, orbitrol type steering system actuates on front wheels through steering cylinders.		
Min. turning radius	6300 mm	
SWING SYSTEM		
Swing motor	Fixed displacement radial piston motor	
Swing reduction	Planetary gear reduction	
Swing bearing lubrication	Grease-bathed	
Swing brake	Multi wet disc	
Swing speed	9.3 rpm	
COOLANT & LUBRICANT CAPACITY		
	liter	
Fuel tank	200	
Engine coolant	19,5	
Engine oil	11	
Swing device - gear oil (OPT)	6.2 (5.0)	
Swing device - grease (OPT)	(1,2)	
Axle	Front	15,5
	Rear	17,5
Transmission	2,5	
Hydraulic system (including tank)	187	
Hydraulic tank	103	
DEF/AdBlue®	27	
UNDERCARRIAGE		
Reinforced box-section frame is all-welded, low-stress. Dozer blade and outriggers are available. A pin-on design.		
Dozer blade	Parallelogram-mounted dozer blade to support machine when working, also for leveling and back filling.	
Outrigger	Indicated for max. operation stability when digging and lifting. Can be mounted on front/or rear.	
OPERATING WEIGHT (APPROXIMATE)		
Operating weight, including 5000 mm 2pc boom, 2450 mm arm, SAE heaped 0.70 m³ bucket, lubricant, coolant, full fuel tank, hydraulic tank and standard equipment.		
OPERATING WEIGHT		
Rear dozer blade	18820 kg	
Rear outriggers	19090 kg	
Front outriggers and rear blade	20040 kg	
Front blade and rear outriggers	20040 kg	
Four outriggers	20310 kg	
AIR CONDITIONING SYSTEM		
The air conditioning system contains fluorinated greenhouse gas refrigerant R134a (Global Warming Potential = 1430). The system contains 0.75 kg of refrigerant representing a CO₂ equivalent of 1.07 metric tonnes.		

DIMENSIONS & WORKING RANGE
